

GEOMAPS User Guide:

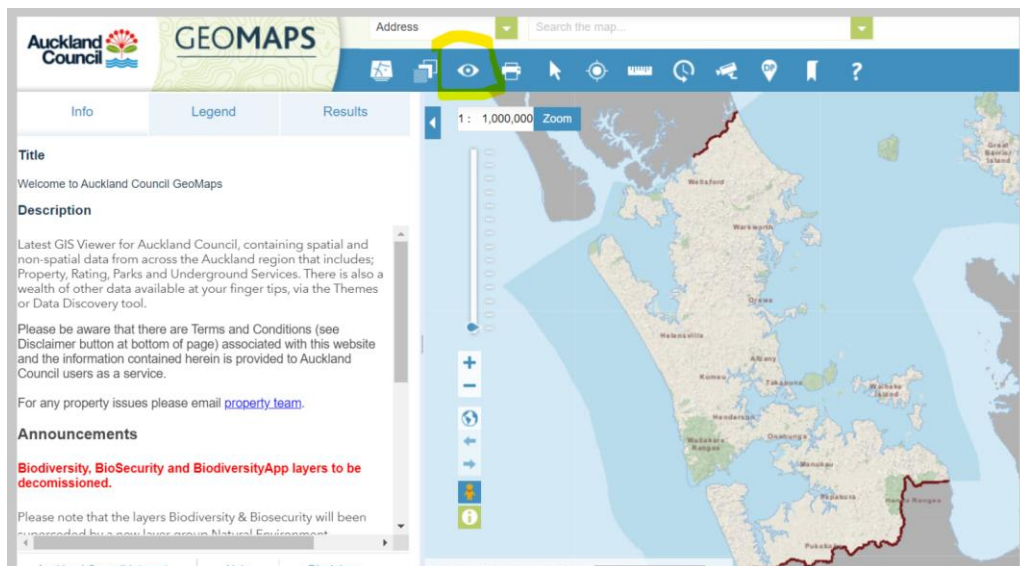

<https://geomapspublic.aucklandcouncil.govt.nz/viewer/index.html>

To help in the review of draft coastal adaptation strategies and understanding the changing coastal hazard, the Shoreline Adaptation Plan team has put together some tips for navigating geomaps.

The following steps are intended to support navigating through the available public data on Auckland Council's geomaps. The examples given are some of the key data that is publicly available and could be helpful in considering coastal hazard risk to assets for the Shoreline Adaptation Plans.

Adding data layers to your map:

Step 1: The easiest way to find a layer is to click on the data discovery eye icon at the top of the screen (highlighted in yellow). You can search for layers here by entering key words, tags or titles. Then click 'add'.

Legend
Results

Data Discovery

Enter a keyword to discover spatial data in the Portal. Click Add to add the data on the map. Once added you can remove the data by clicking Remove.

Emergency
Go

4 results found

Emergency Management by portalex_owner	Remove
Recommendation Version - Management Layers by portalex_owner	Add
Sealed Version - Management Layers by portalex_owner	Add
Unitary Plan - Management Layers by portalex_owner	Add

Step 2: Select the Legend tab and using the drop-down arrows, tick on the layers you're interested in.

Basemap

The basemap can be switched (e.g. to show aerial imagery) by clicking the switch basemap icon (selected in white):

Relevant layers (for Shoreline Adaptation Plans):

Natural Hazards: Contains **Flood Plains**, **Coastal Inundation** & **Areas Susceptible to Coastal Instability and Erosion**.

Flood Plains: Modelled extent of freshwater catchment flooding.

Coastal Inundation: Modelled extent of coastal flooding from high sea levels during storms.

Areas Susceptible to Coastal Instability & Erosion: Predicted extent of areas that could erode or have landslides.

Environmental Assets Map Layers

Park Assets: Shows what Auckland Council park assets exist in an area. Layers you may wish to switch in the legend of this layer include:

- Park extent (general)

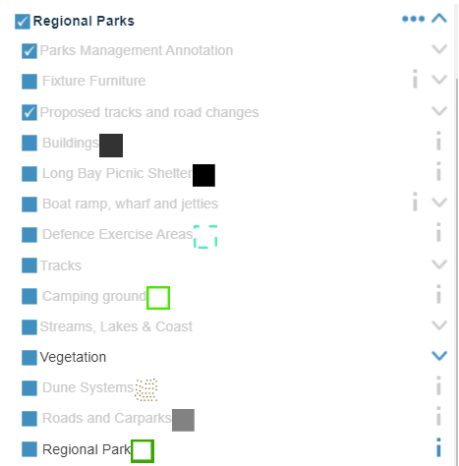

- Structure hard surface

- Garden turf route (walls)

Regional parks:

Underground services: shows infrastructure like wastewater, stormwater, water, power, fibre, etc.
