

Have your say – Safety improvements on Elizabeth Drive and Luddenham Road intersection

Community notification

December 2024

Transport for NSW acknowledges the Dharug, Dharawal and Gandangara people as the Traditional Custodians of the lands on which we work and pays respect to Elders past and present.

Transport for NSW is planning safety improvements at the Elizabeth Drive and Luddenham Road intersection. These improvements are part of a larger project to make roads safer around the new Western Sydney Airport.

Have your say

The community is invited to provide feedback on the proposed improvements at the Elizabeth Drive and Luddenham Road intersection. Currently, this is a T-intersection with no traffic lights.

Transport proposes to improve this intersection by adding traffic lights, medians and dedicated left and right turn lanes.

The proposed traffic lights will enhance safety for all road users, while the new lane arrangements will improve traffic flow through the intersection.

A map showing the proposed improvement is included on the next page.

The proposed improvements are open for feedback until 18 December 2024. To submit your feedback, please refer to our contact details on the back page.

Crash history

Between 2017 and 2021, the Western Sydney Airport Precinct saw 201 recorded crashes, including 141 injury crashes and three fatalities. Crashes at intersections made up over a third of these incidents, showing the need for safety improvements.

In last five years there has been four crashes recorded at this intersection including left turning, rear end and crossing traffic types.

What will this mean for you?

As the area grows with the Western Sydney Airport, this upgrade will:

- Improve traffic flow and support an increase in local traffic.
- Make it safer for all road users
- Use new technology to better manage traffic.

What happens next?

All comments received during consultation for the proposed design will be considered in developing the concept design.

We will keep community members and stakeholders informed of the progress throughout delivery of the project.

Proposed intersection improvements
